San Angelo COVID-19 Statistics Web Application User Guide

Age/Gender Input Box:

The function of this is to allow the user to input their approximate age and their gender to receive specific statistics from the database. Two dropdown menus are available for the user to choose from. The first is the approximate age range, where the user will select the range that their age falls under. The second is the gender choice, where the user will either designate that they are male or female. After entering both of these, the user will hit the "Submit" button.

Email Input Box:

The function of this is to allow the user to either receive the data in their email or to receive alerts when new data is available. There are two input areas in this box. The first is an empty box where the user will enter their email address. The second is a dropdown menu where the user will select whether they want to receive the data or to receive alerts. After entering their choices in both of these, the user will hit the "Submit" button and receive a confirmation on screen.
